## PROFILE SUMMARY

---

Full Stack Developer with **2.5+ years of experience** in designing and building scalable web applications using **Java** and the **Spring ecosystem** (Spring Boot, Spring MVC, Spring IoC). Experienced in developing and optimizing **RESTful APIs**, implementing data persistence using **JPA/Hibernate**, and building backend architectures for enterprise applications. Proficient in frontend development using **React.js** and **Tailwind CSS** to develop responsive web interfaces with optimized performance. Skilled in **Node.js** for basic CRUD-based services and backend utilities. Strong understanding of **Git version control**, **SDLC workflows**, and **Agile development practices** used in production environments. Experienced in designing **system-level architectures** and implementing secure authentication using **JWT**. Hands-on experience integrating **Generative AI solutions** for automation use cases such as chat systems, report generation, and content generation. Deployed and managed applications on **GCP Cloud Run** and **DigitalOcean**, including object storage (buckets), ensuring scalable and reliable deployments.

## EXPERIENCE

---

**iFocus Systec**, *Software Developer*

April 2025 – Present

### TestServ

*API testing platform for validating APIs with automated test execution and monitoring.*

- Developed a full-featured API testing platform supporting query params, headers, request body, and path variable validation with structured error handling.
- Implemented JWT-based RBAC and integrated **Jira + Xray** for test lifecycle management and bug tracking.
- Built AI-driven test case generation and response validation, reducing manual QA effort.
- Designed hybrid data architecture using **MySQL** (test plans, users) and **MongoDB** (execution logs, dynamic test data).
- Developed **React.js** real-time dashboards for test monitoring, execution status, and reporting.

### QwikHire

*AI-powered platform for automated candidate assessment and interview evaluation.*

- Built AI evaluation pipeline using **ChatGPT (FastAPI)** for answer analysis and **AssemblyAI** for speech-to-text transcription.
- Developed real-time AI proctoring with face detection, gaze tracking, and anomaly flagging during live assessments.
- Designed scalable backend with **JPA entity relationships** and REST APIs supporting concurrent multi-stage assessments.
- Built analytics module for candidate scoring, ranking, and performance insights across assessment modules.
- Developed responsive UI using **React.js** and **Tailwind CSS** with role-based candidate and admin views.

**ValidProfile**, *AI Developer*

Feb 2024 – April 2025

### Mentor–Candidate Collaboration & Workflow Platform

*Platform for managing mentor–candidate collaboration, task workflows, and performance tracking.*

- Built task management system with assignment, progress tracking, and performance review across active mentorship projects.
- Developed real-time discussion module for in-platform mentor–candidate communication.
- Implemented RBAC separating admin, mentor, and candidate permissions across all system modules.
- Optimised backend services for concurrent user load across task, discussion, and reporting features.

## AI-Driven Candidate Learning, Engagement & Verification Platform

*Unified platform for job discovery, personalised learning, and background verification.*

- Built personalised candidate dashboard with AI-curated job updates, courses, and content recommendations.
- Integrated AI-based fake offer letter detection system for real-time fraud prevention.
- Developed end-to-end background verification workflows — document upload, validation, and status tracking.
- Unified learning, hiring, and verification into a single ecosystem, eliminating tool fragmentation for candidates.

## PERSONAL PROJECTS

---

### KareerGrowth – AI-Driven Candidate Training & Assessment Platform [kareergrowth.com](https://kareergrowth.com)

*Live production platform for candidate training, AI assessments, and career preparation.*

- Built AI mock interview system using **Deepgram STT/TTS** for real time spoken feedback and communication improvement.
- Designed multi-module assessment engine like General, Position, Coding, Aptitude, and role-based tests in a unified platform.
- Implemented AI proctoring with face detection and screen recording for assessment integrity.
- Built ATS resume analyser with AI-based JD matching, scoring, and improvement suggestions.
- Integrated job listings, course access, and offline coding practice into a single candidate prep ecosystem.
- Deployed and actively maintain platform in live production managing cloud infrastructure, uptime, and feature iteration.

## EDUCATION

---

|                                                       |           |
|-------------------------------------------------------|-----------|
| <b>SEA College of Science, Commerce and Arts, MCA</b> | 2022-2024 |
| • CGPA: 8.57                                          |           |
| <b>CMR University, BCA</b>                            | 2019-2022 |
| • CGPA: 6.7                                           |           |
| <b>Narayana PU College, PCMC</b>                      | 2017-2019 |
| • Percentage: 73%                                     |           |

## SKILLS

---

**Backend:** Java, Spring Boot, Spring Security, Spring MVC, RESTful APIs, JPA, Hibernate

**Frontend:** React.js, Tailwind CSS, Bootstrap, HTML5, CSS3

**Database:** MySQL, PostgreSQL, MongoDB

**Cloud & Tools:** GCP (Cloud Run), DigitalOcean, Hostinger (Domain & Deployment), Git, GitHub, Swagger, Postman, SonarQube, Jira

**AI & Integrations:** Generative AI Integration, Deepgram (STT/TTS), AssemblyAI (Speech-to-Text)

**Concepts:** System Design, Microservices, API Architecture, JWT Authentication, Agile Development

**Soft Skills:** Strong Communication, Problem-Solving Mindset, Ability to Thrive in Fast-Paced Environments, Ownership & Accountability, Leadership & Team Collaboration

## DATA STRUCTURES & ALGORITHMS

---

**Arrays & Techniques:** Traversal, Insertion & Deletion, Prefix Sum, Kadane's Algorithm, Two Pointers, Sliding Window

**Strings:** String Traversal, Palindrome, Anagram, Pattern Matching, String Hashing

**Linked Lists:** Singly & Doubly Linked List, Reversal, Cycle Detection, Merge Two Lists

**Stacks:** Stack Operations (Push, Pop, Peek), Balanced Parentheses, Next Greater Element

**Queues:** Queue Operations (Enqueue, Dequeue), Deque (Double-ended Queue), Priority Queue

**Sorting Algorithms:** Bubble Sort, Selection Sort, Insertion Sort, Merge Sort, Quick Sort, Heap Sort

**Searching Algorithms:** Linear Search, Binary Search, Binary Search Variations

**Hashing:** Hash Tables, HashMap / HashSet, Collision Handling, Frequency Counting

**Trees:** Tree Traversals (Inorder, Preorder, Postorder), Level Order Traversal, Binary Trees, Binary Search Trees, Height & Depth
